PROJECTS

The Glorious School: This is a website designed for one of the schools in my locality. The project was targeted towards the advertisement of the school and registering online through the admission form which is to be filled and submitted online. As this will enable the school management to know the total number of new intake prior to resumption . Built with HTML5, CSS3, javaScript,Git, GitHub Actions
https://thefreshglorious.netlify.app/

Comfy Domicile: This is a website built for an online housing agency which serves as an intermediary between house seekers and housing agents.It aims at providing cozy accommodations to interested residence seekers within 24 hours of application. This website was built with HTML5, CSS3, javaScript,Git, GitHub Actions https://comfydomicile.netlify.app/

Ohmy Food: A website that provides a solution to queuing in African restaurants by allowing users to order for their various dishes without queuing. Built with HTML5, CSS3, Git, GitHub Actions, Bash
https://www.ohmyfood.com
